AI INTEGRATED PYTHON FULL STACK DEVELOPER

Python Full Stack Developer with 1+ year of experience building and maintaining production web applications using Python, Django, Django REST Framework, Next.js, and React. Supports **nearly 20 live websites,** including 10+ built independently across frontend and backend. Experienced in REST API development, technical SEO, deployment, and contributing to a configurable multi-company HRMS in **X-OPP CRM.** Seeking to build reliable, scalable web applications and business software

Technical Skills

Languages	:	Python, JavaScript, Java, HTML, CSS, Dart
Frontend	:	Next.js, React, JavaScript, HTML5, CSS3, Bootstrap, Flutter
Backend	:	Django, Django REST Framework, REST API Development, API Integration, JWT, SimpleJWT
Libraries	:	Axios, OpenCV, Chart.js, NLTK, DNN, Google Gemini API, LangChain
Databases	:	PostgreSQL, MySQL, MongoDB, SQLite
Dev Tools	:	Git, GitHub, Nginx, Gunicorn, PM2, Postman, Visual Studio Code, PyCharm, Android Studio
SEO	:	Technical SEO, On-Page SEO, SEO Issue Fixing, Lead Capture, Brevo, Email Workflows
other	:	Multi-Tenant Architecture , RBAC

Experience

Python Full Stack Developer August 2025 – Present
Delemon Technology *Dubai-Based Company– Thalassery, Kerala, India*

- Build and maintain nearly 20 live production websites, **including 10+ independently developed end-to-end** across frontend and backend.
- Create responsive Next.js and React interfaces with reusable components, property listings, forms, routing, and maintainable frontend structures.
- Develop **Django REST Framework (DRF) APIs** for dynamic property data, inquiries, authentication, and website features; connect frontend and backend services using Axios.
- Improve technical and on-page SEO through metadata updates, page-structure fixes, indexing investigations, and performance optimization across live websites.
- Configure Brevo integrations for website inquiry forms, **lead capture,** and email communication workflows
- Support deployments and production operations using Nginx, Gunicorn, and PM2; troubleshoot issues, maintain applications, and deliver client-requested enhancements.

Project: X-OPP CRM – Human Resource Management System (HRMS)

- Contribute to X-OPP CRM's **configurable, multi-tenant HRMS,** supporting company-specific policies, approval hierarchies, and business workflows.
- Build employee management workflows for employee records, departments, designations, reporting structures, document management, and profile-change approvals.
- Implement attendance and shift features, including clock-in/clock-out, **GPS geofencing,** shift scheduling, attendance regularization, shift swaps, and holidays.
- Develop leave workflows for applications, balances, accrual rules, half-day leave, carry-forward, cash conversion of unused leave, expiry, and compensatory leave.
- Contribute to payroll and employee finance features, including salary structures, payslips, loss-of-pay calculations, payroll exports, expense claims, salary advances, and loan deductions.
- Implement recruitment and applicant-tracking workflows covering requisitions, candidates, interview feedback, offer approvals, onboarding, probation, resignation, and offboarding.
- Support performance reviews, asset allocation and returns, HR announcements, dashboards, headcount reporting, audit trails, and role-based access control.

Python Developer Intern January 2025 – June 2025
Adzyn Digital Pvt. Ltd *Ernakulam, Kerala, India*

- Assisted in developing websites using **HTML, CSS, JavaScript, Python, Django, and Django REST Framework**
- Worked with **REST APIs** to retrieve and display database-driven content.

Education

Srinivas University Institute of Computer Science and Information Science Mangalore, Karnataka, India
Bachelor of Computer Application — Specialization: AI, Robotics and Virtual Reality *2022 – 2025*

Projects

AI Psychologist *Python, Django, OpenCV, DNN, Flutter, NLTK* Source Code of website Source Code App

* Built a full-stack cross-platform AI application combining **text and facial-expression analysis for emotion detection, achieving 87 percentage** accuracy across 250 real-world inputs.
* Implemented **NLP with NLTK and custom-trained models and engineered DNN/OpenCV processing** for emotion classification.
* Developed a responsive **Flutter frontend** with real-time **Chart.js** dashboards supporting 500+ concurrent users.

CRM with Gemini AI Assistant *Python, JavaScript, Django REST Framework, Google Gemini, LangChain* Source Code

- Built a full-stack CRM with Django REST Framework, JWT authentication, role-based access control, REST APIs, and responsive Bootstrap UI.
- • Integrated Google Gemini AI via LangChain to create a conversational CRM assistant with context-aware prompts.
- Developed customer CRUD APIs and Axios-based frontend interactions for efficient record management.
